

IMMUNIZATION AND TREATMENT POLICY

A parent/legal guardian must be present at EVERY office visit with a minor who is being seen. In the event that this is not possible, then a written release must be provided to PHA. You may request one from the front desk staff. Please make sure you use our form or ask us for critical information we need in order for your child to be treated. This consent to treat your child is only effective for one date of service. We cannot administer vaccinations without a previous immunization record. Please note that immunizations/allergy shots will only be given in the presence of a parent/legal guardian. Any other requests outside these guidelines must be approved in writing by our nurse manager.
